

Sample Completed Biospecimen Procurement Intake Form

Example of how a client may complete the intake request form for feasibility review purposes.

1. Client & Project Information

Field	Sample Response
Company Name	NovaCure Biotechnologies
Primary Contact Name	Dr. Emily Carter
Title / Department	Director of Translational Research
Email Address	ecarter@novacurebio.com
Phone Number	(312) 555-4832
Project / Study Name	NSCLC Liquid Biopsy Validation Study
Requested Timeline / Deadline	Initial specimens requested within 6-8 weeks

2. Project Overview

Field	Sample Response
Purpose of Request	Validation study for liquid biopsy assay development
Therapeutic Area / Disease State	Non-Small Cell Lung Cancer (NSCLC)
IRB / Ethics Approval Status	IRB approved
Patient Consent Requirements	Broad research consent acceptable
Special Regulatory Requirements	CAP/CLIA aligned sourcing preferred

3. Specimen Requirements

Field	Sample Response
Specimen Type(s) Requested	Plasma, matched FFPE tissue, whole blood
Diagnosis / Indication	Stage III-IV NSCLC
Total Quantity Needed	150 plasma samples / 75 matched tissue samples
Collection Timepoints	Baseline prior to treatment initiation
Sample Format	Frozen plasma, FFPE blocks or 10 unstained slides
Minimum Volume / Tissue Size	2 mL plasma minimum

Aliquot Requirements	2 aliquots per plasma sample
Matched Normal Samples Required	Yes
Longitudinal Samples Required	No

4. Patient Demographics & Clinical Criteria

Field	Sample Response
Age Range	40-80 years old
Gender Requirements	No preference
Ethnicity Requirements	Diverse cohort preferred
Disease Stage / Severity	Advanced metastatic disease
Treatment History Requirements	Treatment naive preferred
Inclusion Criteria	Confirmed NSCLC diagnosis with pathology report
Exclusion Criteria	Prior immunotherapy exposure
Biomarker / Mutation Requirements	EGFR+, KRAS+, and ALK subsets requested

5. Clinical Data & Documentation

Field	Sample Response
Pathology Reports Required	Yes
EMR / Clinical Data Required	Basic de-identified clinical history
Genomic / Molecular Data Required	NGS mutation status if available
De-identified or Coded Samples	De-identified only
Additional Required Documentation	Collection and processing SOPs

6. Logistics & Shipping Requirements

Field	Sample Response
Preferred Shipping Schedule	Weekly batch shipments
Temperature Requirements	Dry ice for frozen samples
Domestic or International Shipping	Domestic only
Packaging Requirements	IATA compliant packaging
Preferred Supplier Restrictions	Academic medical centers preferred
Special Handling Instructions	Avoid freeze-thaw cycles

7. Internal Feasibility Review (Internal Use Only)

Field	Sample Response
Potential Supplier(s) Identified	University hospital networks and oncology biobanks
Estimated Availability	Moderate to high
Estimated Turnaround Time	8-10 weeks
Feasibility Status	Pending supplier confirmation
Potential Risks / Challenges	Limited availability of treatment naive EGFR+ cases
Internal Notes	Recommend phased fulfillment strategy
